### Tampa Electric Usage History

Kilowatt-Hours Per Day (Average)

## Important Messages

### LOWER BILLS – AGAIN!

The unprecedented circumstances of the coronavirus pandemic and lower fuel costs led Tampa Electric to seek approval from the Florida Public Service Commission to lower Tampa Electric bills. All customers will see a COVID-19 fuel credit on their bills in June through August. Residential customers will see a 20 percent reduction on summer bills, including an estimated \$90 savings through December. Commercial and industrial customers can expect a total bill reduction of up to 14 to 20 percent, depending on usage and rate class through December. Tampa Electric's bills continue to be among the lowest in Florida and are more than 20 percent below the national average.

### The benefits of a modern electric grid

As part of our ongoing efforts to modernize our grid and leverage technology to serve you better, Tampa Electric can now remotely connect or disconnect your electric service. No need to wait for a technician to arrive. This also reduces face-to-face interactions during the coronavirus pandemic.

Note: Remote service requires that you have a smart meter. How do you know if you have a smart meter? Visit [tampaelectric.com/mymeter](http://tampaelectric.com/mymeter) to learn more.

### More clean energy to you

By 2023, Tampa Electric will have nearly 14% of its energy generated from the sun – the highest percentage of solar generation of any utility in the state of Florida and enough to power more than 200,000 homes. Visit [tampaelectric.com/solar](http://tampaelectric.com/solar) to learn more. For the 12-month period ending June 2020, the percentage of fuel type used by Tampa Electric to provide electricity to its customers was Natural Gas & Oil\* 82%, Coal 4%, Purchased Power 9% and Solar 5%. Tampa Electric provides this information to our customers on a quarterly basis.
