Important Messages

More clean energy to you

Tampa Electric has reduced its use of coal by 92 percent over the past 20 years and has cut its carbon footprint in half. This is all made possible through investments in technology that help us use more solar and cleaner, domestically produced natural gas to produce electricity. Today, Tampa Electric is the state's top producer of solar energy per customer, powering more than 100,000 homes everyday with the sun. Our diverse fuel mix for the 12-month period ending Dec. 2019 includes Natural Gas 83%, Coal 6%, Purchased Power 7%, Solar 4% and less than one percent of oil.
